Eurasia guidebook 1

After the nukes dropped, humans, would, see the earth, change, into a desert, and earth's population, 100 years, later, would be 57 million, modern day,

And wars, happened, upon what most considered, the utopia, of earth, the middle east not because, it was lush, and full of life, but because, that's where, most stood, in fact, the middle east was even more, dry

The nation's, of

Israel

Jordan

Iraq

Uae

Oman

Yemen

Kuwait

Would stand along side Iran, and Afghanistan,

And remnants of Pakistan, would fight, the Afghan, military on and off, in the early post, nuke world, fighting, 50 to 67, times and never, broke through, being wiped out in 2 years,

As earth descended into hell, the solar system, would not be better,

Mars population 12 million,
Mars has become, scattered villages and cities, raiders ruling the land, and myths becoming reality, and legends taught, as tradition, only, a few dynasties have existed in its history,

Venus population 1 million,

Venus has only one city, of technological, superiority in a region, away from the acid, and clouds, Venus has died, in culture, and existence,

Mercury population 35k,

A strip of special land, let humans, colonize the planet of death, but no one goes in the sun, and this has isolated the planet, as if the others had, a choice

Dwarf planets population 15k,

All Dwarf planets have 3k each, and thr only left, with trade, routes and ships,
No wars, no famines,

Jupiter population 0

The giant, once filled with over 2 thousand, humans had fallen, from a rogue, ship of earth, crashing, into the city, of the population sending them into the abyss,

Moon population 999k,

The moon making, cities, across the surface, and tunnels, would build culture of, a great dynasty, ruled by one family forn 100 years, and they would be obsessed, with the colors of the ocean, their whole art and clothes and even aesthetic, revolved around it,

And as the solar system was abandoned with no main, trade, routes, or ships, humanity, of those who spread outside would label them, as uninhabitable, and humanity would, spread out populating everything. Beyond, the blue dot that had become, dry

And so it came to pass, that man would start wars upon, their descendants, once, again, in 21890 the earth's, population, would reach 91 million,

And the faction, of the Kuwait, rebels, would lead a war to kill the leader, of Iraq, and it would be and war would be upon them,

On that night, flashes of the sun, would be seen, of which it was, missiles? Striking at the sand, then upon the capital of Kuwait, 5 strikes would, land

And killed 30 people,

For 5 hours, strikes and skirmish between the two, would be upon the desert of the earth, killing 800 but this was not the end,

Iran would set up towns and cities, upon the Iraq, border reaching a population of 60 thousand, this would be a mistake Kuwait Would launch rogue missiles,

And it would strike the cities, killing 45 civilians,

And so Israel now long split unto Judea and Israel, would build a dystopia like city, the biggest of all, colonizing near by villages, this was the conquest, of the Israelites

Killing 12 thousand, Israelites, and 30 thousand, judeans, because the number of the villages, and tribes were beyond any war, over 113 thousand, tribes men, died

And so the city of Jerusalem would be the size of new York, city of endless spires, and lights, and buildings of purple and technology, where cars that were once, ruins, became machines that touched the sky, this technology would, spread jordan, and Iraq, and uae, all tho not as widespread, and now Israel and Judea would be armed, with high, tech armor, visors covering them, like veils, and guns that could shoot, beams of light, burning the skin, of men and it would linger when shot, and would be transparent, so transparent you could walk, through it and so 413 thousand, people of the earth, would perish,
And so each nation's, king would have 300 descendants, of their sons and of their daughters, of whom is their daughters, but of their nation that stretches from all their daughters and sons,
And so this would come in 120 years, and the cousins, of the nation's sons would settle, in the land where the deer used to walk, and where the idols of man stood and where man would spread, and conquer it's self, eating it's tail like a serpent, and the cousins of these sons, would become sons of their land, and their cousins would become, sons of the land of, lizards, that bowl their wrath of fire, and their red skinned, and blue skinned men of clouds,

And so one of the land of lizards, would name his land, Indi and name the whole of land, Asia and his region east Asia, and so his descendants of a sister would have a child in the desert, named Tibet and it would stretch, out across the desert, of the descendants who claim the land, they called chi and upper north, of those descendants who founded tribes, of which they called the ice, maulgol

And so in the desert next to the land of the indi, a tribe saw a moon glowing, half it's size, like a blade of the night, and a star next to it, and they would find the land, called Pakistan, and thr land near them kashmir would become a nation of settlers of the descendants of them, and indi

And the descendants of those who were in afghan, of their mountains, and lack of the liquid that brought, life which, was of the sea, but not bitter, and deep but sweet, and shallow, and gone by the early day, and the descendants of Afghan would be but, the named of the descendants, of Iran, of which is the land who called them Persians,

And so the descendants of Iraq, Assyria which is also their. Grandfather, would make cities, of ran by men who were like ducks, with no feathers, and they would make a male, and female one and the female would, have long hair, and the man bug and beefy, and no hair and in suits not of their, flesh but uh machine to defend those who carry their child,

And so between the land, of the Nile, and of the jews, descendants, those who would of thought, the desert would stay upon the earth, but the earth would sprout, it's children of which are it's seeds, to feed it's step children, of which are homo sapiens, and the tan of the land, would become, green and of the colors of the wilderness, that were before the nukes,

And the sun wouldn't, harm those who are descendants, of those sons, daughters, and children, and cousins, but now man could pick up the daisy, which looked like the sun, and the sun ould not burn it, but no hold it and to be consumed, the bones, of their flesh, and so the land from the Nile, and to the descendants, of the jews, would be armed, Africa, and it's regions of which would be, named
Central
North

South

Western

Outer

And the water bluer, then the water, they drank of which was brown, would shine again, upon the suns face,

And so those who once stood in the land, of the Nile would be formed again, like "mud" and would called themselves, like their ancestors, the Egyptians, and the Egyptians spread their roots,

Of which was of Africa,

Libyan's

Sudanese

South Sudanese

Chadian

Algerian

Tunisians

And their descendants would birth, the

Ethiopian

Somalians of which one would be called their nation their named and land and one would be called, Somalia

Nigerians and the others who called their land Niger in the desert, sun

And this family would, eat itself, of civil wars, and of famine, and their rivers, that fed the root, became blood, and poisoned, the tree

And those of which were the jews, would be apart of that root, and would die, with the descendants of Kuwait, and of yemen,Yemen,

And another branch, on the same tree, of Europe, would fall off, and plant itself, and had no roots because, it was a branch and had no roots, to feed itself, so it stole its roots, from the land around it, and so would those around them, and Asia's branch and fallen, off too and would grow no roots as well, and it's leaves, would fall and feed it, destroying itself, for centuries, until a great poison, through smoke, in its lungs, would split it,

And the leaves of all trees, would fall, which were their children, who would leave to a land, they called the south central and north, of the land they called the America's, and 80 million, children, would plant new trees, where new roots grew, and now all trees of each, land would be planted, and the Americans, of the south north and central, would fall to themselves, and the other trees, and now 400 thousand, years later, those who were trees became seeds, and so the land died, and became dry, again, with some of its fertile, land which wasike the women who carried their, children would remain, and now this is where we sit humanity, in a timeline of which I would tell to see, and who hears of a story that, is not true, but of something that is the opposite,

The earth, in its age, of isolation had many species like us humans,

And so I will explain, the collapse the rebirth and the second collapse,

1 rebirth

Many species would come, mostly lizard, and bird like, and as well the sea was more alive, then ever because, the sea trade died.

The peacock squirrel emerged 80 years after the nukes with big eyes of yellow, and a tail that could spread out with red like eyes, it lived in the region of India, and humans for along time would not tame that land again, which was 19 thousand years, the peacock squirrel, natural prey is bugs, and it eats nuts and fruits, it's predator is hawks who survived the nukes, as well mountain lions, skunks, and spider monkey's, and upon the Tigers, all changing their fur

And so now we have Laos again cracked, and dry

But the coco mouse has survived, for 40 years before going extinct 5 thousand years later, reasons unknown, some say from a rogue asteroid, a giant bird or rising sea levels, but these mice. Had tails of brown like fur, curved like a coconut, and then spreads out, making it a easy prey for birds, but it eats insects and even anything that has rot. Away,

And so these, are the species we know of but no their deaths.

1 blue haired fox

2 falcon

3 apes

4 Tigers

5 Mountain lions

6 Jaguars

7 crows

8 carpet fish

9 glass fish

10 glass frog

11 horned toad

12 africanized bullfrog

13 gemsbox

14 ghecko

15 sabor tooth Tiger

16 dodo bird

17 ground sloth

18 sloth

19 gray hound

All lived, for 80 thousand to 100 thousand years,

But the ones who didn't survive even 12 years after the nukes, were these

1 bulldogs

2 white peacocks

3 peacocks

4 daddy long leg gianticus,

5 giraffes

6 Mongolian horse

And 1 million more,

But not all animals are equal, and they survived to modern day,

1 hornet

2 bees

3 fungus infected humans

4 ox

5 octopus

6 squid

7 giant squid

8 seals

9 polar bears

10 honey bears

11 brown bears

12 black bears

13 devil dogs (bears)

14 javelina

15 pigs

16 hogs

17 wild chickens

18 bulls

19 cows

20 maggots

21 horn fish

22 stone fish

23 sun fish

24 European otter

25 American centipede

26 cyro pod

27 weaver ants

28 black ants

29 fire ants

30 bullet ants

31 bug head ant

32 slave ants

33 wolf ants

But after the second collapse, a war would shake nation's. And the generations to come

As the giant cities, in the desert stand shining a council called punic proclaimed a idea to unite all former Roman lands, and to pick up extra territories to "protect them" and also, to serve in other wars but not take their land,

And so they would fight, the two tribes of crio and agagites, from north to the east of Carthage, after 3 months claiming 3 thousand lives and the former land of Carthage'S capital
And so it would be the capital, of the council, as of that, time and the Roman republic, would be named and the nation's of algeria and Libya would be, triggered to war claiming, that they would,

"Cut off everyone one of their heads and burn the foolish council of their hersey"

And so 50 thousand Algerian men. Stood and 5 thousand Libyan Sling men, and 30 thousand Roman men and 1 thousand former Greek men,

The Roman's went to fight algeria and, fought near the capital of algeria, and the former Greek men in the bottom of Libya, finding a abandoned, train and they could not drive it but it could drive, itself because it's lever was not broken,

And the train began to move, and the Greek men cheered, the train headed to crash into the capital, of algeria as the Roman's fought, the Algerians losing 6 council leaders, unto that point saw the train crash and surrounded the Algerians from the coast to the desert, and took the capital claiming algeria for them selves, and so Libya had sent 300 men but none came back, and the army later went upon them at night, and killed 8 council leaders in their sleep,

And so the former leader of which was cyprus, commanded 200 archers too assassinate the commander of the libyans and it was so,and the commander with his servants, while eating grapes on a throne, and the sun was blocked and he was no more,

And so the 2nd commander of Libya paid militia men to kill the heretics, he proclaimed and it was paid in death for a year but the Roman's did not fall stacking their population, into the army and when the 2nd commander which was of Libya ran out of money, he sent his 500 servants with daggers, the Roman's made their robes of white look like blood, in their blood of the libyans

And so the Roman's sent the former Greeks who had been settled in Carthage, and sent them unto the libyans, and not a single Libyan stood more ran then fought,

And so the Libyan king would join the council the council said he was too useful to give up and so Libya became Roman, waving flags and banners that Julius ceaser once held,

And 3 years later the republic would claim the land from which Israel once stood, but the descendants, of the canaanites stood again, 100 thousand stood, upon Canaan and the Roman's flooded them from, the mountains of Jordan, where there was a path, and the Canaaanites would fall, and so the republic would claim Lebanon Syria, and turkey next, and as well Spain and Portugal, and so a coalition called the coalition, of Europe would form with 6 nation's, from west Europe to east Europe,

And so Sicily with, technology of the 1700s that was before their existence, of their people would invade taking, 5 towns from the republic, but would be pushed back,

And skirmishes, across all of Europe would come in 3 years,

And the invasion of Spain saw Portugal betraying the coalition, and andorra regaining it's land becoming greater andorra and the republic would spare them for now, but as for Greece owned by the nation of Athens, would be annexed in 44 days,

And so Bulgaria Macedonia would make a front defending Europe in a wall, of men who would fill their own graves,

Over 80 thousand, men our what the republic "called, dead men walking"

But as it came to be Sicily would be annexed, making Italy send 5 divisions across the border, being ripped apart of its southern half, in 5 days now reinforcing men across the alps and san marino and Vatican, and on the border against the republic, with 8 divisions standing.

And so the island near Italy owned by France, would be invaded men of France not wearing armor with only but cloth, and using swords like all nation's of the time would fight with 1 thousand, men vs hundreds by the time they had 189 men, left they saw that the island had been set on fire, and the republic would leave and go, seek Italy.

And so Vatican would see the boats, of their end the pope said,

"They shall kill me our all catholics but no province of the kingdom will truly fall"

And the Swiss guard would defend for 21 minutes, and the pope would be exiled,

And the Italians, sending 500 men would hold the republic back, for 4 hours from north to east, and san marino would shut it's gates and defended with 4 thousand men, killing 3 thousand Roman's of the republic, and 2 generals,

But it would be burned to the ground, the castle consumed by the flames, and so would be Italy outside their walls, and Italy with just 2 divisions, left would be sent back to the alps, and with a population, of 4 million they gathered 90 thousand men, for the final war and France and Germany, sent 2 thousand, each with them.

And so hell would come the leader of Italy who was quickly, chosen after the first one died, saw the beautiful alps, rivers and isolated, towns, of Italy and back at the distant fire, and so with 90 thousand men, they would fight

And spread like, veins but would, be cut out becoming fragmented, losing almost all, 12 thousand returned no leader, so those who were left became chiefs and new tribes formed,

And so as the Roman's on France beheaded men, on the beaches of France, Persia would join sending 50 thousand, men to help France, and Bulgaria and 10 thousand to austria,

And the republic, would invade bosinia, taking it with horses, and would cause the capital bell to collapse on the statue of the leader, and Croatia was split into two, austria sending 13 thousand men, to help would do nothing, rivers turned, blood. And so Slovenia would defend with only 5 thousand men, resisting for 8 hours,

And so it would come France and Persia would, bleed out the republic over 6 years, gaining some of Spain and Lebanon, and Syria. But greater andorra would be annexed, later that year on the 6th year, and French Spain would, fall

So now those where the republic touched, looked like hell, bodies hanged, pools of blood, tombstones and mud never to shift, back into grass, instead it cried the rain that fell upon it, and so the black swords men would be formed killing any Roman's who entered, Persia or France or Europe, in general over 60 existed across the borders, making the republic fear, for the first time,

The black swords men, wearing full black, armor and it's head shaped like a wolf, and their swords, massive or skinny, depending on their body shape, fast and dangerous,

But the Roman's lit the sky, of Slovakia, with a ... ball of fire, this was a boulder covered, in oil and it would be unleashed, as a test burning the capital, of Slovakia but to annex the land they needed, to kill the land of the Germans, brothers, austria.

And so 3 weeks later 40 thousand Roman's marched through, the country side was destroyed, but austria dropped, a ring from a arrow it was clear as a pearl, of a master, it flashed, sending a Shockwave, a explosion 5 miles wide, it had seem that Europe was so desperate, that the hidden weapons they did not want to use had to be used,

And reapers unleashed, from the tunnels, of austria stealing the souls, of both Austrian men and Roman, men and so austria would make barrier zone, between land of the corrupt and land of the holy,

And so a holy guard formed, 8 thousand strong, red armor and wings made of metal, they were corrupt, and twitched, slow but fast, killing hundreds of Roman's, before fully falling austria had no more to stand, and would be annexed.

And so a year later Slovakia too which had a plan of the churches in the nation,

Slovakia would drop the holy staff into the ground, and it would make a dome of white seen from Germany, and 500 thousand Christians would fight for 6 years, against the Roman's even pushing as far back as Greece before falling,

And so France would be invaded, as well, and would lose it's southern half, in 2 years but would make a technology of Valerie's, trees that launch beams, of light like artillery against the nation of Roman's and their republic, but France would fall,

In the uk and Netherlands and Belgium and Luxembourg, and Denmark Sweden and Norway, would unite into a Christian, kingdom to stop whatever came to them

Germany would hold back but, lost it's southern half in the last days of the war, and it's notheren never touched by any nation and became a place of monsters,

With the uk, Netherlands, Belgium Luxembourg, and Denmark with Greenland, and Sweden, and Norway, and later Iceland, they would have a popping army of 5 million, and a architecture of many varieties,n in year 400 thousand and 18 a sub group in the Netherlands would form the lamanites who would settle in northern Germany, the land of the monsters but they also settled, in northern France, and then in Russia, where snow is heavy, but does to not kill. And over 300 thousand would exist in year 400 thousand and 23 the kingdom of christ after fighting with the Roman's, for the 5th time that year and being successful, they would make a stone wall of rocks, to block out northern Germany and France, and it was 3 miles long, it would be defended by peasants, and attacked by the lamanites, on 2 occasions one for whom the lamanites, claimed their god had said, and the other by the will of a king, and a peace treaty would be of both, and this is would be all we know, of the kingdom as of now, but will be told upon later,

After claiming former Roman, lands the saught the America's, and set off, and

The tribes of flordia saw the boats calling them floating, houses Florida around this time had only 50k people, and 3 tribes and since earth was still but just sand, they could not HIDE!

Instantly the tribe of Hana, saw arrows hit them, losing 23 men

Then it was war as Roman men landed they hunted, from behind rocks killing 80 republic men, but then 1 thousand republic men were sent killing over 400 tribes men of Hana, from the north to south, taking the bottom of Florida,

So the 3 tribes united, forming the nation of Florįda and expanded into Virginia then settled into it 5 years later birthing a population of 80 thousand,

And 10 thousand men

And had fought more men of the republic in jamicia, why exactly the republic needed resources not land, so they went everywhere and so did the flordians, waging war for 2 years in hamicia losing 2 thousand and 300 in Mexico and 600 in Brazil and allied with 8 tribes, across the America's and one in cuba form the nation of which is the name we call, Cuba forming a kingdom made from long walls isolated towns and a massive city, armed with 8 thousand men

fighting against the republic for 6 years but would be colonized, so the nation of Florįda would tell the tribes of the Bahamas to claim to be sovereign, so they could strike fear like they could not, be stomped if there was enough then why fight, but the republic swiftly burned their islands who had trees still, and the nation of Florida saw the islands burn and would burn, as well and all would fall

In the land of the north of Germany, where no nation claimed because of the 100 years war had corrupt, the land became foggy. With a orange, casted light unto the ground, like the sun did of which showed 2 suns instead of one, some of the floors of the dried soil was made of flesh, showing that the species had become like plants, only sentient,

And the land had tunnels from a million years ago, which no one knew what war but the tunnels, had lights and ammo crates and helmets, with skulls still in them, The weird humanoid four legged, and wrapped in cloth bleeding through, species called the flick roamed in there the tunnels go for miles becoming homes, hundreds live in the tunnels, of the flicks outside bones and other species walk like Buffalo who have no skin,

There is humans as well either insane or normal, surviving out of sheer will

The land has no sustainable soil for plants, and the architecture which also had laid 1 million to 999 thousand, years ago from a decade they do know which humans had called the 1940s, the buildings in the north tho of which this year were covered in blood, and mold grew on them, very few buildings of that time stood,

A faction used to stand in this land wearing gas masks, and using machine guns, far more advanced than anyone of the time,

But would be wiped out in 80 years after the 100 years war,

But as for the species gliders, and skeletal, freshers would be the biggest, numbers

And the bugs of the ecosystem, would be the most dangerous being the size, of elephants this was because the spores forced evolution, the kingdom of christ would build, a wall like said to stop the monsters,

But that wall would fall 489 years later,

And the monsters would spread to the Netherlands, and Belgium but not fully mostly, though then they spread to the whole of Europe, and the republic which was still around would do nothing to stop them letting them spread to all 3 continents, the republic would collapse do to civil war 1300 years later,

And the people of esrth 3 billion upon the planet, would form a atomic culture, because everything reminded humans, of the nukes that dropped of their ancestors described of their

ancestors in, 2020 and thousands of factiond would rise during this atomic culture until the great cleansing,

And 200 years later, the middle east and Europe and east, Asia stopping at India would be filled with vast cultures of which was 3 thousand,

And so nation's like the kyzers would make advancements, in water preserves making a new tigris, and reviving it, bringing plants like apple trees that looked different because it had only 2 arms, and spiky leaves but still produced fruit, the pineapple and potato and tomato and as well corn became common during this time,
But the wars between groups in Greece, of which was the Yuri and anontites, and would come to be the kush, as well would claim over Egypt, and discovered the weapon blueprint to make, guns again, bringing the technology back and it spread in 113 years, across the land,

And the nation's of those who roamed between the mountains, of Jordan and Saudi arabia would be conquered, and in Kuwait the remnants of thoseweird ducks of flesh, would be extinct from the hands who made them, and in Europe the phinites would go extinct as well, which is a people group who had a culture of the sun worshipping it and calling the moon the devil, and the germania tribes, who had Rosen again in northern Germany, would go to war for their land and because of their paganism, of which both were pagans, the war lasted a year,

And the sun would appear purple from earth, because the pollution from the monsters would, become so strong

And in the north of Persia a outpost, called Terra, with a great city with advancements beyond imagination, glowing in the distance with metal that could walk, which were called androids, which had existed on Mars and still do, but not like these these, were big chunky and purple, or green, not used in war but to carry luggage, but for the androids that did fight in combat they moved either fast, but died fast or slow and died slow, over 1200 androids were used in war according to the outpost, which had called themselves the futures and declared to be a nation, the size of the Vatican city which existed thousands, of years ago and the other Iranian nations, were small like them, like tribes that had basic, tech but not primitive all though tribes did exist. They were the fill in for the population,

And commonly would go extinct, and in the world more than 5 thousand tribes existed with the 3 thousand nations.

But they were all but primitive or about to break, they're old ways like the calma who had guns and hundreds of villages, but would fight 3 other tribes and one nation and would win 5 times but would be bombed by artillery shells, and consumed them and their descendants of those who survived split into many existing cultures or a few new ones,

But while others fell, to their enemies some grew into empires like the nation of olma had conquered 10 of its neighbors, and this would come to be in a stand of 5 years,

By making trains and tanks, and as well planes, and many mechanized technologies, and the sky became black in their enemies skies, and the nation had killed 7 million,

This would cause 3 more nation's to declare, war

The parhicians Russians and ocalptics

They had sent 3k men from south to north to the middle,

And would expand into the land, of their northern half first. And the landmines had met the men of the enemy first killing 39 men,
And then 3 weeks later 24 more, and then the month after, 2 elites, of which had funded the war, and the Russians who had made tanks, could blown the men into ash, and so it was so and 300 men would die, on the ocalptic side and now Russia had now own, a quarter of land, and which they did planned strikes night and day, for weeks killing thousands, of those who had no weapons and those who did, for those who had no weapons were innocent and had not shed the blood of the Russians, even if they cheered for the victory of their people, and they're ways but so the army of the ocalptics would use weapons that could fly which are drones, and this would kill 666 Russians in a matter of the week

And so a peace treaty of which after 23 more skirmishes, would be held Russia got its land and ocalptics got their money paid in damages, and so the nation of which was Russia, would colonize those who were the descendants of Finland, and as well Norway, but could not enter Sweden for they had used a cursed relic, odd which turned the rivers into blood and the borders into walls of fire, and defended knights, wearing armor of black and of white and blood, and of which 10 thousand existed, and over 11 million had lived into the land, and so it would be and in the land between Persia and Afghan and the land of Pakistan, all groups would die and their descendants were 400 at the time, and all had lived in tribes or small nations, and in those who remained and 2ent into Saudi arabia and into Iraq and unto jordan and Syria, and settle for 344 years. And then in the year of 500,13 they would become the kingdom's of which where 5 of them of the kingdom of Syria jordan and kingdom of zoar and the nation of gash and core had existed, as well and would be bigger than the nation's around them and would come to fight, of those who opposed them,

But of which a nation of a new settlers in the land of where the ancestors of the kingdom's, had fallen in Persia would settle the descendants of the republic which was the gaiates, and would settle across the fertile land, and make the republic and had colonized Armenia and Azerbaijan, and the rest of Iran, in which would be on 90 years, and wiped the blood from they're clothes of the rebels in south Iran, and would declare war on the kingdom's of zoar gash jordan and assyria and the other kingdom of Saudi state, and would come to never take Iraq like they wanted but did take the land of Afghanistan and of the uae, and of the capital of Oman,

And yemen would be bombed for 2 years of which because they're enemies which were those who could kill from the continent to another, and they would be once again wiped from their clothes but this time with the oceans, water and the vinegar of the villages in their own homes, and the milk and honey rotted even though honey can not rot,

Later in the year nation's of new Canaan would fall and it's Allie, the babylonians who had the baslians, who had a population of 4 thousand of which the group itself had existed since the 2nd rise of the republic,

But so on the birthday of the 2nd republic, of which those were those who had the descendants of the old republic, who which won the war that lasted a hundred years and had won over flordia and over Cuba and so on. But on that birthday a bomb of which was a nuke would drop on their controlled Armenia, and of southern Iran, and this would cause the nation's from turkey to Iraq lands of those inbetween in those lands that lived, to declare war on those who dropped it the Kani who had existed in Georgia, and would win against the nation's of which was 40 but 20 still stood and Kani, stood from turkey to Syria to Georgia to eventually Armenia, and the nation's declared war because the republic had the technology to rebuild the earth, and now 2 percent had been wiped which was the last 3 percent out of 98 percent, of lost technology, that had been built from technology that could lead man to explore back to the stars to help those on Mars and the moon first, so the 20 remaining nation's had sent militias to gangs to, even servants to fight over 40 thousand had died, and so thr republic Kani and 20 nation's had built bunkers for the citizens, of the land anyone from any land could come, and stay like they were children because they were of the soil, they lived on that may have died because of them, but their children could make it breath again, over 500 thousand had been in bunkers across the 20 nation's and 3 million in the republic, and 20 thousand in Kani, and all nation's built from anti air craft to tanks to drones, to the missiles, that blew the night into the "sun" and for 45 hours war waged the sky was "alive" with the technology of man, and 20 thousand fell and the bombs that some called the "sun" had dropped only killing specific regions, of earth but of those with the most valuable technology, but the weapons and cultures shifted, and now we have a land even more dry and raider cultures and bandits and very few nation's, of which was a hundred handful,. And now what stories will unfold, "not only on the blue dot that isn't blue as it once was but the others"

Eurasia:myth of mars

Mars:2900 a.d

I look up around at my surroundings and it's all but ruins and old technology, from the old dynasties of which was only two existed only for 300 years. My brother Kate also looked at his surroundings playing with his toy of a android, i saw a colony of olmans, a sub species of man the size of a fly, they walked into their tunnels and had hunters wearing bushes on their body this seems to be the clay tribe it seems,

Then I noticed something shine in the sand I picked it up dust and a few olmans, fell off. It was a pair of goggles,

Nice I say!

Kate wow is that one of those old world technologies when the earthlings, used to be here.

Casy/mc: no I think this, one is from the early colonial, period.

Kate: whatever boooring!

Casy: sighs, whatever kiddo, c'mon let's go the tape worms will be here you don't want to get eaten, spooky! Haha.

Kate hey! Don't say that I'm scared of them,

And so they went into they're village in the distance as giant pink tube worms, moved like patterns, stretching for thousands of miles, eating anything into they're mouths, a Martian badger got caught, between a tree and rock and was eaten, it's blood gushed and it's leg snapped, and it was no more,

And so later a dust storm came to pass, and the children of the worms spread birds would eat them, and vultures would rip the adults apart and eat them that way, meanwhile in the village casy and Kate had starting eating dinner.

Kate: I don't want to eat potato, noodles!

Casy your eating it! Sighs OK look this is food be happy, some cities don't even have potatoes, do you really want to eat cloned qua you know I found it's teeth in my soup last time, look man I mean I could just throw it our and you get no food,

Kate: puts arms in a crossing position,

Casy: fine then throws out food*

Kate: shocked* why did you do that he said angry, !

Kate: rushing to the trash can* see I'll eat ir picks up potato noodle, and trying to eat it,

And casy slapped it out of his hand,

Casy: hey don't do that!

And kate, started tearing up

Casy: wait? What's that sound,

Sounds of yelling in the distance*

Kate looks around hearing What's outside, on the door, putting her head against it.

A boom goes off* and it sounds like it's dragging, in the air.

Casy: get down, grabbing her brother, and holding him behind the sink as tracer rounds, rip through the kitchen window.

Raiders outside, grabbed women and children alike, raider: take all the women and children the boss will love this,

Then a knock at the door knock* knock* KNOCK*. The door swings open, and kate is taken but casy is remained,

Raider: leave her she's too.old and useless,

As they left, casy had screamed out to her brother, exclaiming her fear.

And so casy gathered her stuff, and the towns folk said :you must not go it's not safe. Casy: closes her eyes* I have to, I'm not gonna let them take my brother from me.

As she sets off she looks back, and sees the people who are worried, not even embracing them she leaves. As she left unto the desert which was like blood and oranges, she rested at a rock nice and firm, from the sun. Then a walking beast it's body and.legs pink even skinny and it's eyes pure purple, it screeched. And casy had grabbed a rock from the ground and threw it all it did was knock off,

Casy: what is this thing?

The beast began to twist it's body to her, and slowly walked as casy ran away, it shot sap it had stored in it's mouth, hitting the ground around her.

Casy looked down the floor was hissing and burning, casy: if I don't find a way to kill it then I'll be bones by sunset,

She jumped onto, a tree, and pushed against a cliff knocking, it over crushing the beast it was no more. She then removed its eye, which was pure purple and strained it, this "goo" came out. And it dirtied her hands she could use this to trade in the next cities, market which where the old dynasties used to exist.

And so she went off into the market in the city of kush, and it was a market of black magic and of African culture thst has survived for 2 thousand years on Mars selling tobacco, and coffee seeds and even old world guns from the year 2056, and so she set her pad in a area and laid the eye which could be used, for dye was there. She had also had placed a few pieces of scrap metal, and a shape charge which is charge that can power hover bikes, a rare technology and so a lady named Emily came by.

Emily: yo? Is that a shape charge I've been looking for one of those grabs it casy: woah ay you gotta pay for that emily: calm down kiddo I will but I got no credits, can I pay you with something else.Casy:like what? Casy looked up at Emily a buff women withered hair, and a mechanics clothes, emilt: well I can make you a gun I'm pretty sure you had a hard time fighting those things for that eye. Casy: sighs* ha ya alright so where's your place Emily: well it literally has my name see haha

She pointed at a sign that says Emily's

They went into her shop and Emily had made her a gun a small pistol, with a few bullets.

Emily: here ya go kiddo

Casy: thanks I'm looking for the men who took brother.

Emily: hmm I see well I'm jot gonna let some child hurt herself and your brother pulls out heavy rifle*.

Casy: woah that thing is massive

Emily: than-

Then sounds of bikes are heard in the distance, emily: it's them casy: who? Emily walks up looks at the window some guy named Tim tower had a gang, who control one of the last sun powdered panels. So he thinks he can control us.

Authors note: turn page

And so Emily opened fire her guns feeder shaking, as the bullets ripped through a soldier and pushed him into a area, where people had been eating.

Bandit 2: all of you get down

The second bandit opened fire his pistol raised it missed and then out if no where a bullet, from cady hut his shoulder sending him into a wall.

Bandit 2: cletching his shoulder* Damm women

Casy raised her gun and fired at his head putting him to a end

Then rifle rounds went off lighting up the market destroying, multiple pots and killing 3 sellers, casy: uh Emily!

Emily turning from the other side of the wall emily: die you Damm bastards!!! Her gun once again shaking as she fired she cletched onto it as it ripped through the bodies, of the 3 bandits. A few rounds hit a barrel of oil causing a explosion,

Bandit 6: taking cover* who are these two?
Bandit 7: I don't know but Tim is gonna chew us up if they kill us he says while loading his Shotgun,

The 7th Bandit fired and 6 rounds went off hitting cattle, and barrels causing another explosion. Which spread to the southern market.

Emily fired once again sending the Bandit back unto the ground bleeding out of his stomach,

Bandit 6: shocked and traumatized* wha- are.. these two?

Then he saw the 8th and 9th Bandit be murdered, by shop owners

Bandit 6: I have to get our of here!

Emily: oh no you don't who do you think you are?!

Emily: casy you know what to do

Casy: aimed and shot his head ad he ran away,

Collapsing to the grown

The bleeding Bandit was asked, Emily: where's your boss Bandit 6: he's dead OK! Emily: huh? Bandit 6: another mob boss sent us to kill you the one who stole your friends brother! Please let me go! Emily: hey don't lie you idiot! Casy: wait no he's telling the truth if these were sent by that man the. We know how we can track him tell me where's the boss who sent you Bandit 6: I don't know where he is but his gang hangs around sandy hills and shiny valley Emily: well we know where we're going smiles*
Casy: uh huh girl

As both walk off the market sellers took the Bandit who's bleeding and hang him up as a reminder.

And so they walked upon to later a bar just a mile off of sandy hills, inside was a old bartender and a few others inside drinking, and a android mostly droid and lesser man, had been smoking his head made out of metal and his eye had a red dot which moved back and fourth, Emily: looks like he knows what's around here casy: ya hey uh sir? Or uh android:what so you want human he said in a buzzing voice, casy: have you seen any len around here going to sandy hills android: and what type? Of men are you searching for casy: those of the mob boss who have kidnapped my brother android: look kid you're brother is either dead or a slave the boss has so many connections, it's like a knot that forms a Matt

Emily picking him up out of angry said

Emily: look she's not gonna ask you repeatedly where does the men who work for the mob boss we're looking for go to once in sandy hills.

Android moving his hand which is the only hand with flesh worn like a glove he said android:look you Damm ape I don't know where your stupid friends brother us now get your paws off of me!

And he had kicked her off but was quick to say android: they go to the former capital of the haf dynasty now leave! Emily: that's all we needed

And so they went off to sandy hills,

Once they had went upon sandy hills they saw trade stops and guards holding guns from the dynasty period.

Casy: how are we gonna get pass that this must be the most tight trade route

Emily: we should go through the southern side

Casy: isn't there cameras over there?

Emily:yeah but we can make through

And Emily got up and ran to the south aide behind a rock and called casy over and casy followed Emily seeing the camera knocked out a guard, and turned off the cameras but! All, of a sudden alarms started blarring

The doors opened, and guards started opening fire

Emily: casy! Go now

As she began to fire casy ran away but Emily had been shot with her jaw severed and her eyes left bloodshot,

Casy then ran 3 miles before stopping, casy: no no Emily!!! Why has this but happened to me they had must of planned for us

Casy:I must avenge her by killing the boss of this criminal organization

Casy then walked back towards the sandy hills but took the northern route and made it to a city,

And so she had walked into the building of the mob boss it was a masion, and she had been filled with rage and had killed the mobsters that she saw as monsters,
Mobster: hey who are yo- and casy fired copper ripping into his flesh poisoning him and tainting, his soul after wiping out the 2nd floor of the Mansion, she saw the mob boss smoking mob boss: hello there Missy casy:where is my brother you monster! Mob boss: well he's already apart of the family.

He then proceeded to pull out her brothers arm, and threw it at her casy was horrified and when the mob boss turned around she grab him and stood on his body, and said this casy:I'm not going to let you hurtt another child the mob boss chocking could not speak but casy do not care, and murdered him.

She then went out of the masion and walked into the distance of the desert knowing that the empire of the man who killed her brother will collapse.

Eurasia:guidebook 2

And so it was unto the land of the continent, of Europe which was the nation's of prussia Germany France Switzerland and many others.

And the first war was upon them which was the nation of prussia and France and so prussia had sent 400 soldiers, to saxony which had a army of 1,200 musket soldiers but prussia still had won burning barrels of beer and wine and huts, which had the cattle that fed the land and killing the horses of the husband's of the wives, and the town which name was salea was in the hands of prussia. And France had now called upon Bavaria and Bavaria sent 8 thousand men to the town to take it back, but the rivers were destroyed filled with bodies and the prussians set charges to explode, upon contact and it was so 4 barrels of black powder tnt consumed 20 lives of the Bavarians.

And sonprussia pushed further taking the village of Gloria and italia, which later would be turned into the kingdom of Italia in December 4th 1806. And so France sent a army if 2,300 men and the Prussian army now had been weakened like a shepherd who lost his sheep and lost Italia. Which had not welcomed the French into their house and grabbed their muskets and flintlock, and loaded them with the ammo they had on their hands in the homes of the men who hunted

Elk and the men who cut the wood that built their homes as well, and a army of 800 arose and so the papal states now had been exiled for 3 years, arose in Vatican city with a army of 400 royal guards and same would of been for the naples and arise a army of 120 rifleman the rebels of Italia had clashed with the papl states rebels who had doughtnwith the naples later upon the next month. But lost the Vatican to the Italian rebels surrendering their land and the home of the pope who was sent into exile once again, as for the naples who had gained land out of it stayed neutral with prussia and the rebels of Italia. But prussia who had gathered with austria and the united kingdom had clashed a armies that combined 33 thousand men from most were calvary middle were artillery, and even less were musket men and the land of France had been burned for 10 thousand acres and the rebels of Italia had pushed out militias that had been paid by France and captured the general akalmai and demanded land from France to give them the alps which France had not given instead they agreed to be given southern Italy, and so the land was given and the nsples would be wiped later in the following year. And the flag of blue turned into blood stained with mold from its forgotten people and the pope was reinstalled. As of if though it came to past that statues had been built of gold, upon every nation of earth which was 15 nation's and 80 to 1 thousand tribes, and these statues held a book of a religion that had been made in 1455 called aydrian following the teaching that humans can rule above eachother as the core reaching, and that those who are of different nations are Species of man all though they had the same skulls and bones and DNA the religion would grow to 130 million followers forming a coalition of the newly independent Italy and of austria and kalian and oro, and birthed a vast culture of polytheism where humans who conquered others or did impressive works would be worshipped and so 6 thousand humans became God, even though they would die this was considered that their body was not young anymore and that they would go to heaven called gnenian, art depicts them dying in the earth as dying normally but to the view of spirits and demons to turn into roses if from western Europe and green from the east, and blue from Greece. And would go to hades if they were in Turkish lands ruled by the eventual Persians who would be seen as purple demons instead of the traditional red in art they had horns made of gold or copper with crowns on them and were barely clothed, only with a rag that would fall off if ripped they were gluttonous all though famined even though the Persians and turks were humans they weren't viewed as so, and so the religion had fought with them multiple times and built towers where they prayed the design was Gothic and the guards wore a circle shaped half upon their head and robes covering them, and spreads with spirals. And the taul who told the story of their gods wore black robes and covered themselves in ash, and and the listeners wore robes that didn't cover them fully but only their bodies and the colors were from white blue and pink red, and the book called the book of the gods was 800 thousand words long and 1 thousand pages long. And 11 chapters long with 5 books. But these were the essential doctrines and not the lesser stories of the lesser gods. Like the glowing child who's sister had died in the river styks. And murdered the trolls on the island of giants, the religion birthed many mythologies and cultures and dominated Angola Polynesia and Oceania, and then ... it collapsed consumed in civil war and collapsed and the religion would remain with 20 thousand followers of which they call themselves the angels of the emperor who they ca the god of Europe who ruled over the minor gods and myths and creatures making them for chaos and for order, of a ecosystem all though Christianity and Islam would later grow the followers would

decrease even more to 50 calling themselves the statues of the old world then they disappeared. And now the world is on the year 1899

And so the deaths humanity had forgotten jn the year, of 1807, the island zanzibar revolted against the British but they're fight had not come yet, instead the sultan had invaded the city of tanga and 20 Arabs had died and as well 300 German settlers and 1 thousand zanzibari. But then the British had joined and 1,800 British, police joined killing 1,200 zanzibari 400 natives, and destroyed Port zuguri. And so the war ended

But unlike that war the war of this worlds 1812 between America and Canada, was different

In 1812 the tensions arose and America saw that the united kingdom was distracted with its Allie France and invaded canad clashing at Detroit and leveled 4 villages, and artillery broke through 3 divisions killing 6 thousand more then a officer struck on the Canadian, side lead to Canada falling back deep in the forest where the native tribes sent 145 men and slaughtered 90 Americans but the forest and it's spirits left because it saw the blue clothes of the Americans, in waves of 10 divisions over 12 thousand men killing the natives the chief seeing the situation held with his 1 thousand men for 4 hours, before falling after being struck in his side. So the tribe left unto the land with 80 more taking out 50 Americans and 20 in the north taking out 5 americans, but 16 in the middle fell to the massive army who "consumed" their numbers. As the Americans marched the 80 and 20 natives moved up north and prepared a attack charging into battle as the American army came up splitting into south, and north. And all natives died all though they brought 18 with them now 5 native villages burned with 700 dead and 100 warriors dead. And 4 thousand Americans dead, meanwhile the Canadian army marched into maine with 3 thousand men taking 8 cities seeing 10 clashes, with 8 thousand dead and lost 3 of the 8 cities. And the natives had also turned on the Canadians but thought they had been attacked first so 12 Canadians died so 700 Canadians swept into they're lands killing 1,300 warriors as the bision roared running away crushing the bones of natives and Canadians alike, the forest burned and rivers were filled with Dead birds and ducks then 400 natives took out 900 Americans and 200 Canadians and 3 French visitors, then fed themselves off the ducks from the last surviving ponds and pecked the bushes of the last color in their leaves. And on the 20th night they lost 5 men and 8 Canadians had been shot and 1 American shot a archer injurying him the American then was shot through the shoulder then the leg, then was killed and Americans willfully sent 7 men to hunt the archer down 3 died from traps 1 from a bear but eventually the archer died from 2 bullets, what later came was the last Americans was death brought by 60 warriors. Then on that late American towns were set on fire sending a sign that the natives were not over 4 new chiefs who were chosen led armies each of 100 charged into battle killing 2 thousand American soldiers, and losing 94 so they set up traps of which was from poisonous frogs from spiked I'm the ground to whatever gunpowder they had. Which burned then removed limbs then in the year 1813 after a battle in Quebec between 200 Americans 500 Canadians and 120 natives the capital of Quebec fell, 5 Canadian divisions fought afterward all failing one fled later clashing with one of the 4 chiefs killing him America knowing it would be hard to take all of qubec ad it was fractured between 2 native territories and 4 Canadian and 2

American, so they split it between the nation's Canada agreed ro give qubec and the natives kept their side but the war was not over the united kingdom allowed volunteers which 70 joined the first day being killed within minutes of arrival. So the British fires from the coast killing 80 us civilians and in Canada 40 natives dead and 20 Canadians. And British soldiers arrived in lousanian land which was about 80 pushing through 3 towns. And killing 90 Americans and they held down for 3 months before 45 American soldiers fired artillery at them destroying the banks and brotherls, killing 20 of the British soldiers but the united kingdom continued to bomb the coast killing a total of 300 In their run. Whole the clashed between the natives killed 3 thousand more and killed 800 Canadians. Later Canada grew in soldiers as Irish immigrants joined to gain citizenship over 50 thousand immigrants so France sent 14 thousand volunteer soldiers to the usa clashing between 300 Irish men who all died except for 30, and 80 French men died then 60 Irish then 40 more, and then 1 thousand so the revolt of the immigrants began making the Irish commonwealth with a army of 8 thousand a holding in the furtherest north of canada, clashing with the Canadians and natives killing 800 Canadians and 300 natives. Then the Americans killed 12 thousand Canadians in the province below Quebec and finally Canada gave up, giving each faction it's land which the native tribes held for 40 years and the Irish held for 2 and the Americans held for 200.

And so in 1899, the American collapse began of which new York Delaware and Rhode Island and Pennsylvania formed a alliance of which is when the all Southern states split and had done the same, and the united states owning onto the southwest and Midwest went to war with the rebels that formed in Texas but had lost and had to sign a declaration in 1907 to give independence to Texas and oakholma over 50 thousand had died from the war. And then Nevada saw the the night light up by the warlords of California the sky screamed and so did thos ehwo lived the casinos collapsed the water tainted, and soldiers moved into the desert aiming their rifles and shot ceos and wealthy men the united states bombarded the Nevada desert with artillery which had gotten more advanced from the previous war, over 800 people died on the first day and then 60 the next and so 4 more the next but the battles of Las Vegas killed 80 thousand, and the battle of Chicea, killed 23 thousand. And the ww1 tanks of Mexico fired upon Nevada the tanks were small with machine guns and had allied with California to be given some of southern California, over 113 Mexican tanks stood no match for the US army and 6 thousand Mexican soldiers fell to the desert. Than 5 planes shot down the us army had bled the enemies of the president but it was not enough 31 thousand Californian soldiers with 10 thousand Mexican soldiers stormed from all sides, and then Idaho militia either rebel or loyalist fought the united states or California which Idaho would be put down and annexed under us mandate Idaho, but Nevada would be annexed by California and the united states agreed to make a buffer state of new Nevada to act as a blockade for any future wars. And had to sign a paper after a protests of 115 thousand people in Washington after a few skirmishes killing 1,300 people. And the republic of Washington formed as a nation and grew a rivalry with California fighting across their border and funding militias in the north and even a pager bomb killed 80 people in LA, and us soldiers fought in their wars with over 45 thousand fightinf over 3 years and jn the year of 1923, and the states of South and north Dakota fought wanting to gain independence but wanted to form a united Dakota us forces deployed 10 thousand troops fighting in urban warfare and bombing gas stations cars and using the great depression soup

stands as bunkers, the Dakotas used handmade bombs commonly and won independence in 1928. Both still at war like the Koreas and so in 1956 the united states now named united coalition lost its Canadian states that had been clashing with Canadian forces which was over 5 thousand and clashing with new York and Maine forces which was 3 thousand and clashed with over 300 united coalition forces, and so Quebec gained independence and so did the state below it. The united coalition could not stop it after they were in Vietnam losing 300 thousand soldiers and fightinf along side texan forces who lost 100 thousand soldiers, and 40 tanks.

Then came (the fall of oregon) 1967

And so to the coast of Oregon which had been flamed by fire and flaked it's skin, which had killed 20 people and 300 thousand acres but marines of the United coalition army moved, in because a terrorist leader in his house planned to stage a coup with a army of 19 thousand men but the us army sent the marines who shot through his house killing his wife, his uncle and his father and arrested his mother. But something was off he wasn't there just a empty desk the soldiers opened the backdoor where a hidden grenade had been set up removing the 4th soldiers leg, and then smoke arose from the other room the stove had been set to explode and only 2 soldiers made it out while the 2 others died ad the house exploded and the mother of the terrorist died to because she was still in cuffs, meanwhile 50 terrorist soldiers in Oregon put down the last 2 soldiers and covered 200 meters of land, and later would face a bombardment the united coalition which wasn't playing around they had been tired and sick of the collapse and famine, of their land and the starvation of their ideology. The terrorist lost 25 men and the rest fled back to the leader who prepared over 1,500 attacks, that night stoves pagers and cars blew up and barrels of gasoline were lit on fire, over 99 people died and 177 injured and so the capital of oregon saw helicopters of the united coalition fly over it and over 800 marines shooting civilians, and terrorist alike public executions also took place and families were separated and fathers killed for swinging bats and throwing rocks and so for the reason of all these separations wad from the economic collapse but oregon was different it wanted to be a economic superpower not a colonial but this was but impossible, because of their extreme ideology of state of judgment where if you even stole bread you would be sent upon 15 years of your life and 15 pounds of yeast would be donated to who you stole. But the war continued at the river between Canada and oregon 133 unc marines fired at 18 oregon terrorist which manged to pick off 21 of the 133,

(Battle of knockhill)

And so on the October 6th 200 thousand unc soldiers surrounded the newly constructed fort of knock which and 13 thousand terrorist who armed themselves, with muskets and cannons early on they lost 5 men who had been shot in seconds and 7 injured the unc lost only 2 so the terrorists all fired at once with multiple shot rounds and one lane crouched and one stood killing 300 unc troops, and the terrorists lost 60. And then by the 1st hour 3 thousand unc soldiers had died and 200 terrorist but this would not be long once, a tank she'll hit the fort blowing a hole through and killing 80 defenders, and and 12 unc soldiers rushed in killing 5 more terrorist before falling. And boom! Another shell from the west killing 30 defenders. And then a shelling

from unc forces in the surrounding areas because 1 thousand terrorist soldiers had tried to escape all had died, so a group of 20 and 90 defenders went out to the outer walls and the 20 fought for 5 minutes killing 10 unc forces and the 90, killed 45 unc forces in 40 minutes. Then the inner defenders which was 5 thousand left and they pushed outward like a bulge of water through the west which they lost 32 men and killed 12 they managed to get 5 men out of the front and the bulge was pushed back, but held it's circle form so 60 men formed a firing line killing 80 unc forces before 10 were shot down then from the east a bomb came through shortening the number by killing 8 more defenders, and so the terrorist seeing the situation used the last of their blackpowder grenades to kill 40 more unc forces and now they managed to get 3 more men out through the east and 4 out if the south west. And then they had finally fell all were either killed or surrendered going to jail or fighting for the u.n.c. later one of the 12 survivors who escaped stepped on a bear trap it clapped his leg, and a u.n.c soldier called him a traitor before a bullet went through his head.

(Clash of the peasants)

And so in the streets of oregon barricades made of wood scrap metal beds and trash cans were opened fire on which over 100 barricades had been set up, and over 300 defenders u.n.c forces with 6 thousand matmrines instantly shattered through 3 of the barricades killing men as they fled a man reported seeing a son run away dropping his gun before a shot gun she'll ripped through his back, he also saw men hurry and gather more pieces some were shot down as well he then fired back and killed a soldier he felt fear for the first time he asked himself "what.. what have I done" meanwhile bar owners set up their own forts with over 38 bars setting up with a force of 60 combined as u.n.c forces made it through they shot them but then a pipe bomb crashed through the window consuming a man and his family as he shielded them a thrift shop where a old lady had fired a pistol at a soldier injurying his shoulder. But her thrift shop was set on fire with a car, then 10 of the defenders cane down to the destroyed barricades and took down 3 invaders and they lost 1 of their men which was a brother of a fighter, in the south a gun shop had supplied 86 guns to 23 more men and women one was a grenade launcher it killed 5 of the invaders while the ak-47s punched holes into the chest of foes and friends glocks wasted so much ammo it was kore than a colony of ants, then another barricade 3 defenders gone and the remaining 5 charged in with makeshift melee weapons 2 shot down the other 3 missed their hits after being shot down, 1 more defender came around the corner with a hunting rifle shooting a u.n.c soldier down then all of the u.n.c soldiers opened fired the man shook in place as bullets went through him people ran past him not helping him knowing he was dead. In central of the town a statue of the u.n.c leader had been melted to make bullets, which infected the u.n.c soldiers since the metal was old copper about 130 years old. Over 200, of the invaders died from this and a car with 5 red necks cocky fired their weapons into the air which then a rocket shell breached them killing them only the fatt one survived as the skin, of his friends fell off he ran off but was stopped by u.n.c soldiers they shoved him aside and fired at the truck just in case the enemy was Alice they then went to shoot those in the supermarket which 13 had been defending with nothing but pipes and hand guns only one managed to shoot a soldier in the kidney, the town had been turned into a war zone a helicopter flew over firing into crowds hostile or not hostile, it didn't matter. It was later shot down the driver struck in his temple

crashing into the buildings near by killing 12 people who had been hiding. As people ran next to the crashed helicopter 2 struck down in the head by special forces one person with a handgun fired as much as he can but he was shot he held his stomach as they shot him again. And so 5 more barricades broken through 60 more dead. People from other towns had came to defend as those 5 broke through over 400 more killing 2 thousand of the u.n.c soldiers dogs charged through ripping through the flesh and hunters stood afar shooting down the soldiers and the terrorist group who had been raging through 7 cities came to help as well with 70 men which would die but would kill 50 of the u.n.c forces the u.n.c air force than bombed the country side killing those who didn't fight in the battle which was about 100 and killing 90 defenders. And then silence, the battle was over. The u.n.c, forces won,

(Californian invasion of oregon)
In the August 13th of 1962 Californian forces entered a small amount of oregon, which was big enough to fit London and bir tawil, but only had 4 cities and then Californian forces with their simple camo and bent like hats that hunters wore used their rifles on the general gangs killing 8 of them they even shot dogs that would make noise they then killed the leaders of the gang called the assiassians, him and his 2 closest member swrre executed on a mountain top "so it was war" the gang proclaimed they said which the gang had over 800 members which they loaded up their uzis and handguns and ak-47s and 3 trucks road up in the town opening fire on a squad of 12 Californian soldiers, most missing their shots the soldiers surprised went behind cover and one had been finally shot and died the soldier behind a house opened fire hitting a gang member in his stomach and another in the nose the other truck opened fire again missing its shots, and eventually killed 2 of the soldiers the remaining soldiers fled as the town was token over by the gang the Californian army hearing this sent over a task force of soldiers task force, 808 armed with heat detecting rifles and natural gear to hide 2 of the soldiers hid in the trees one said "why doesn't the army just send a bigger team" the other said "we don't fully own this place yet we don't want to disturb any other forces who exist here" then one of the gang members selling a illegal substance was spotted with no mercy he was shot 3 times. The one buying the drugs ran the soldiers did not fire at him since he wasn't they're target. And in the south 1 gang member was shot and in central another, and north 3, the gang now realizing they could not fight this fight recruited members outside the county sending 21 "fighters" as they called them all were untrained and all died except 1 who was taken in, he said "I don't know anything OK i barely even joined today" so it was true the gang was influencing outside forces the gang member was sent to 6 months of community service, a week later Californian forces opened fire onto a town with 60 of the gang members grenades and bullets had ripped through sheds cars, and houses 7 citizens were caught in the attack so the Californian soldiers with a team of 40 who had lost 9, soldiers they went through the south north and center in losing them like a scorpion, not all died infact 5 of the californians died. But for sure the gang members fell and over that month over 23 skirmishes would happen and other gangs like the vipers and ms13 would join the war and a terrorist group called the sons of earth, the vipers would lose 13 battles on the coast, and the sons of earth won 2 and lost 1 the ms13 had over 80 battles many undocumented. The assassin's who fought 6 more battles before leaving to where the other terrorist group who had started the war between oregon factions and the u.n.c, meanwhile the vipers pushed into the coast managing to take half the city setti f up makeshift barricades and

ms13 was more ragtag still setting up outposts and owning streets they were easy to kill, over 30 died daily. The sons of earth took chunks of ground mainly in the wilderness and made forts and made up a army of 1,934 the Californian army sick and tired of how slow the annexation have taken so they sent 7 thousand men killing over 900 vipers and fought the sons of earth for 21 hours and the ms13 lasted for 5 days in the region, as they fell the sky smoked and it was gray and buildings filled with those who had died in the buildings they resided, or hid, in. And so the county was annexed and the California's rebuilt it to be better not a city of gold but better not good or bad just better.

(Washington invasion of oregon)

And the armies, of Washington called the guards, of Washington, and they were 10 thousand strong And after losing, 2 counties to the u.n.c they needed to re expand. And so they invaded the north of oregon clashing with terrorist forces killing 123 on sight, and taking the coastal islands and inner islands of oregon, after clashing with the remaining police of the 1st county, which were only 100, strong. They had claimed the county of clawlitz and Clark County, and then they fought upon Portland the city had already seen burnings gangs and family, rivalries, and so only 80 thousand died and Portland county was annexed, and so 8 more counties would be claimed in a peace treaty with the formed gangs, in the counties and terrorists, rebels, and civilians and those who went back to spears which were primitive, tribes,.

(THE formation of new oregon)

Over 3 terrorist groups formed a new terrorist organization, which is
1 new Olympia

2 new county

3 core

And their army was over 200 thousand,
The u.nc first saw them while delivering 7 tanks to the Frontline against the terrorist group who started this war, (d.f) the new oregon army had 28 soldiers positioned in the forest once the trucks drove on the road ro them they opened fire lmgs were used, and so were rocket launchers rifleman shot down soldiers who tried to escape all 7 tanks were destroyed and all 60 u.n.c personnel died, later at 5 o clock a drone was sent it spotted the new oregon soldiers, and it fired a shrapnel bullet killing all of them in 8 minutes, new oregon now had a reason to command war because the news of them attacking had not gone outside of the u.n.c borders. They had over 456 missile trucks and sent 80 spread across oregon putting down people who tried to stop them with rifles killing civilians gang members hunters, and fathers, and mothers, then finally a missile fired at the mandate of Idaho a state, of u.n.c it killed 4 people. And the u.n.c fired back with a jet flying over and taking the missile truck out the soldiers inside tried to jump out but it was too late, over the course of that month over 30 thousand bullets were fired and over 12 thousand missiles and 5 thousand artillery shells and 1,200 tank shells, killing 3

thousand new oregon soldiers and killing 90 thousand u.n.c soldiers, other factions like the d.f with a army of 700 thousand losing 60 thousand soldiers,

And on July 6th 1964 the city of new front was bombed with u.n.c artillery the first strikes killed 21 people, civilians ran for their lives carrying their children as u.n.c artillery continued the next wave killed 40 civilians and then jets flew over the sky targeting the banks, and food banks over 30 of them were bombed killing owners and guards, the d.f. could do nothing once they showed up they began to evacuate civilians specifically young men, 2 hours after the bombing over 200 mote had died, and so 90 new people joined the d.f,.

(The awakening)

On the year 1985, arizona and new mexico would split through a vote, over 4 million people voted the u.n.c could not afford to keep manufacturing, and controlling them which would later have southern Utah be given to Arizona, who would form a union with new mexico as the mezo, union, and the age of pop culture would form in their country.

(The legion)

In Oregon in the year 1987 a obsession within the people would form, a empire wearing red yarn hats and metal armor and democracy would finally be restored in northern oregon, cities like new Athens and Olympus. Would reach populations to hundreds of thousands the technology would reach steamwork and train stations, the nation which would be called the byzantine state by writers would be considered a cult by most, showing how far gone oregon was. The fact Roman like nation's formed showed how desperate it was and in October the u.n.c would execut their 4th king, and the monarchy died turning into a diarchy, switching every 6 months the military of the legion only clashed with d.f and new oregon soldiers losing almost every battle, since they had legionary men not platoons. Then in 1989 the diarchy would die people marched through the streets burning pagan symbols, and throwing their riches into the river and the infrastructure of some buildings collapsed, democracy would stay but kings and queens would die they cut their heads off

(THE end of oregon)

After the u.n.c and new oregon and d.f fought for 12 more years many, factions came and went but oregon would gain it's death after the collapse of the u.n.c who collapsed from its lack of economy and constant war, which made Alaska gain independence and as well nebraska, Montana, and all other territories, as for oregon, it would be split between the byzantines d.f and new oregon, becoming 3 nation's.

(THE independence of neveda)
Neveda, was given it's land back by California, and formed a militia with over 12 thousand men and Vegas was expanded to 1 quarter of the state, as for the earth's population was bigger than it was 200 years ago.

And in the year, 2000, random wild fires began to spread across the America's, until it covered the entirety of new York and than it spread to the entirety of the surrounding states, and major Canadian cities humans began to flee as wild fires later spread to Brazil on massive scales like scars and bullets, and it was so in Chile Argentina and Europe, which would consume all of the nation of Belgium and half of France and the entirety of the Netherlands, humans from Mars began to help the earthlings as for they are the reason they exist but they could not help the helpers would be consumed by the fire. And so the nation's of earth claimed over Siberia fighting a ruthless front against the Russian empire who stretched from the baltics to Ukraine to mongolia, over 400 thousand soldiers from 100 countries operated from robotic beast rising from being shot from shells and be lit on fire and from tanks being abandoned with their men and too the economy of earth had a coalition of Texas and other US state nations, who helped to spread to new major cities they placed in Siberia where the economy wad like a man made of gold brass and copper, but dead beyond that like how a fruit falls from a tree and is consumed by the maggots, just like how the Russians were which they ran and ran being shot down by high class soldiers and rebels and too soulless robots and even more soulless men, even their allies had slit their throats betraying them china invaded mongolia and then Siberia and so did north korea annexing, south Korea and small parts of Siberia and so once Russia was just remnants in Petersburg shooting at anyone who came to the walls of the city which was 18 thousand dead, and so when this happened 80 million fled from the continents into Siberia to settle, forming tribes cities colonies settlements and war states but the Russian empire launched their warheads which was all of them and it landed across the planet but they did jot launch it onto Siberia, and so humanity restarted in the middle east with 57 million human beings and so did it in Siberia all though these two did not know of eachother. And so our first story begins in 2100 a.d and this story ends here,

But someone had said that they had saw a vision, they saw a endless tunnel, made of two walls which was made of stone with beings on thrones who were dead skeletons she looked down a endless swirl of clouds was upon her, she then saw paintings everywhere on the beings there was thousands of paintings on the hundreds or thousands of beings each was a human? She even saw herself and than saw it connected a root of her entire bloodline.

Eurasia: the world government (so far)

In the year 2900 a.d, a group called the one world government with a few hundred to thousand members saw to unite Mars after the collapse from the war of the two dynasties 200 years ago they would first start by growing a alliance with local villages which grew their territory into the size of lichenstein, they wore no armor when coming into battle though just white coats and carrying rifles infantry was costly losing 8 men would be vital but they still pulled through after the collapse of the mafia which fell to a figure outside of the one world government known as a women of cash the one world government would be able to expand safely without having to take out small gangs who were loyal to the mafia. They quickly grew more villages into their territory growing to the size of serbia but this would lead to other, groups forming nation's before this

revel groups already existed but not as a centralized government attempt the nation of hergia would form to the borders of the one world government and was the size of Bulgaria as the rush, for advanced Mars technology began for jets that could reach up to the atmosphere but not space would be successful made by third party groups full air battles with hundreds of air forces would be accessible now which would happen at the battle of phoencia where 200 hergia planes would attack a small number of 115 one world government planes that were being tested instantly a shot went off sending, a one world government plane into another exploding upon contact the planes broke away into smaller groups as the battle began.
